

I support XM Radio broadcasting of traffic and weather and benefit from listening to them. Satellite radio provides variety and quality that are not available to me elsewhere. I pay for these services and it should NOT be up to the National Association of Broadcasters to dictate what I am allowed to hear. I therefore, respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand, deserve, and pay for. In the recent flooding in the Detroit metro area, the traffic and weather proved to be life saving. My XM instant traffic and weather provided a safe journey home. I support XM instant traffic and weather.
